

### 3 Design Aid 3.12.7 Recommended Height-to-Thickness Ratio Limits for Precast, Reinforced Solid Non-Load Bearing Wall Panels

Note:

1. Panel reinforcing must be sized for factored loads and handling.
2.  $f'_c = 5000$  psi, normalweight.
3. Figure applies to non-load-bearing panels only.
4. Deflection of panel must be checked against acceptable limits.
